

Virtual currencies, real risks. The only guarantee in crypto is risk.

It is important to read and understand the risks involved in investing in virtual currencies, which are listed below:

Warning

- the value of your virtual currencies can rise or fall sharply, and the initial investment may be lost completely;
- virtual currencies are not covered by the guarantee funds that cover bank deposits;
- there is no legal mechanism on the virtual currencies market to prevent market manipulation or insider dealing;
- virtual currencies depend entirely on a specific computer technology and infrastructure, which in certain cases may be very recent and not yet adequately tested;
- if one loses the identification code or password giving access to the virtual wallet in which the virtual currency is stored, the currency held therein will be irretrievably lost;
- virtual currencies are currently accepted as a means of payment to a limited extent, and in most countries there is no legal obligation to accept them;
- for more information about the risks associated with an investment in virtual currencies, we advise you to read the Wikifin page "[What is a cryptocurrency? | Wikifin](#)".

Crypto-asset advertising in Belgium is subject to the rules imposed by Regulation of the Financial Services and Markets Authority placing restrictive conditions on the distribution of virtual currencies to consumers, approved by the Royal Decree of 8 February 2023.
